

According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0579-0036. The time required to complete this information collection is estimated to average 2 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

ANNUAL REPORT OF RESEARCH FACILITY

(TYPE OR PRINT)

3. REPORTING FACILITY (List all locations where animals were housed or used in actual research, testing, teaching, or experimentation, or held for these purposes. Attach additional sheets if necessary.)

FACILITY LOCATIONS (Sites) See Attached Listing

REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS FORM 7023A.)

A. Animals Covered By The Animal Welfare Regulations	B. Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain-relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs were used.	E. Number of animals upon which teaching, experiments, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress on these animals and the reasons such drugs were not used must be attached to this report.)	F. TOTAL NUMBER OF ANIMALS (Cols. C + D + E)
4. Dogs	5	41	84		125
5. Cats					
6. Guinea Pigs	8	519	58		577
7. Hamsters		39			39
8. Rabbits		144	64		208
9. Non-human Primates	68	62	379		441
10. Sheep					
11. Pigs	3		129		129
12. Other Farm Animals					
Cows			1		1
13. Other Animals					
Prairie Voles	368	826	149		975
Meadow Voles		60			60
Bats	7	12			12

ASSURANCE STATEMENTS

- 1.) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2.) Each principal investigator has considered alternatives to painful procedures.
- 3.) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4.) The attending veterinarian for this research facility has appropriate authority to ensure the provisions of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

Summary of Exceptions
University of Illinois – Chicago
33-R-0018

The Institutional Animal Care and Use Committee of the University of Illinois – Chicago has approved an exception to the minimum space requirements in **Subpart D Section 3.80 Primary Enclosures** of the Standards promulgated to implement the Animal Welfare Act for the temporary housing of male and female baboons (*Papio sp.*). The exception granted was that the male cage does not have to provide twice the minimal area required to house one animal during periods of breeding. This exception is for the period or time that a female baboon is placed in the male's cage for the purpose of breeding. This period generally does not exceed five days and the male cage contains 15 sq. ft. The exception was granted because the housing is only temporary in nature, and it is generally accepted practice for many species that the female is taken to the male's cage for breeding. It is the consensus of the veterinary staff that the current system provides adequate space for animals to engage in species specific interactive behaviors. During the last year, 4 animals were temporarily housed under this exception.

The Institutional Animal Care and Use Committee of the University of Illinois – Chicago has approved an exception for the requirements in **Subpart D Section 3.84 Cleaning, Sanitation, Housekeeping, and Pest Control** of the Standards promulgated to implement the Animal Welfare Act for cleaning/sanitation of primary cages. The exception granted was that cages used to house nonhuman primates maintained in a BSL-3 facility would be changed every thirty days instead of every 2 weeks. The exception was granted to minimize potential staff exposure to infectious agents as well as minimize potential macro-environment contamination of the BSL-3 facility during the cage changing process. Cages were spot cleaned on an as needed basis during the 30 day period between cage sanitation. Forty-five macaques were maintained under this exception for periods of 60-90 days. The health and husbandry of the animals maintained under this exception was monitored by the veterinary and husbandry staff during the course of the project. No health or husbandry problems related to the exception were noted.
